PRIMARY EXAMINER

Art Unit: 2823

The following is an examiner's statement of reasons for allowance: there is insufficient teaching for combining Mase et al and Moslehi et al, because the use of laser trimming, which grows films not exceeding 25 angstroms, as disclosed by Moslehi et al, to grow a thermal oxide on silicon as required by Mase et al, would destroy Mase's et al invention, since Mase's et al invention requires 500 to 1500 angstroms thick films, which is well beyond the capability of laser trimming. Therefore, the prior art of record neither anticipates nor renders obvious the claimed subject matter.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
